Strategy to address just transition issues related to climate change policies

NDC (2020)

Fair and inclusive decarbonization

Just Transition of the Workforce is a cross-cutting and integrating element

Workforce impacted by transition to carbon neutrality, effects of climate change and accelerated technological transformations

Education, training and awareness-building: climate change into formal education is essential to promote just transition

Ministry of Labor (2023): Strategy for the just transition of the workforce towards a resilient and low-carbon economy, improving the quality of life and the social and economic inclusion of the population

CLIMATE ACTION LAW (2021)

Just transition of the workforce: one of the pillars of the transition to carbon neutrality, climate resilience and low-carbon development

Transformation of the economy towards sustainable production mechanisms, green jobs that provide quality of life and social inclusion

Ministry of Labor (2023) –with Intersectoral Commission of Climate Change-: new opportunities of job training, reduction of gaps in access to green jobs, needs of the vulnerable population.

Strategy to address just transition issues related to climate change policies

E2050 -LTS- (2021)

Just transition of the workforce that improves the quality of life and the social and economic inclusion of the population

Formulation, follow-up and monitoring of a national strategy for the just transition of the workforce to 2050

Adapt the educational offer and training for employment within the framework of carbon neutrality

Creating conditions for the just transition of the workforce and the generation of green jobs

Investments and incentives for the creation of green jobs

Ministry of Labor

Pact for Green Jobs and Just Transition in Colombia with International Labor Organization Office for the Andean Countries

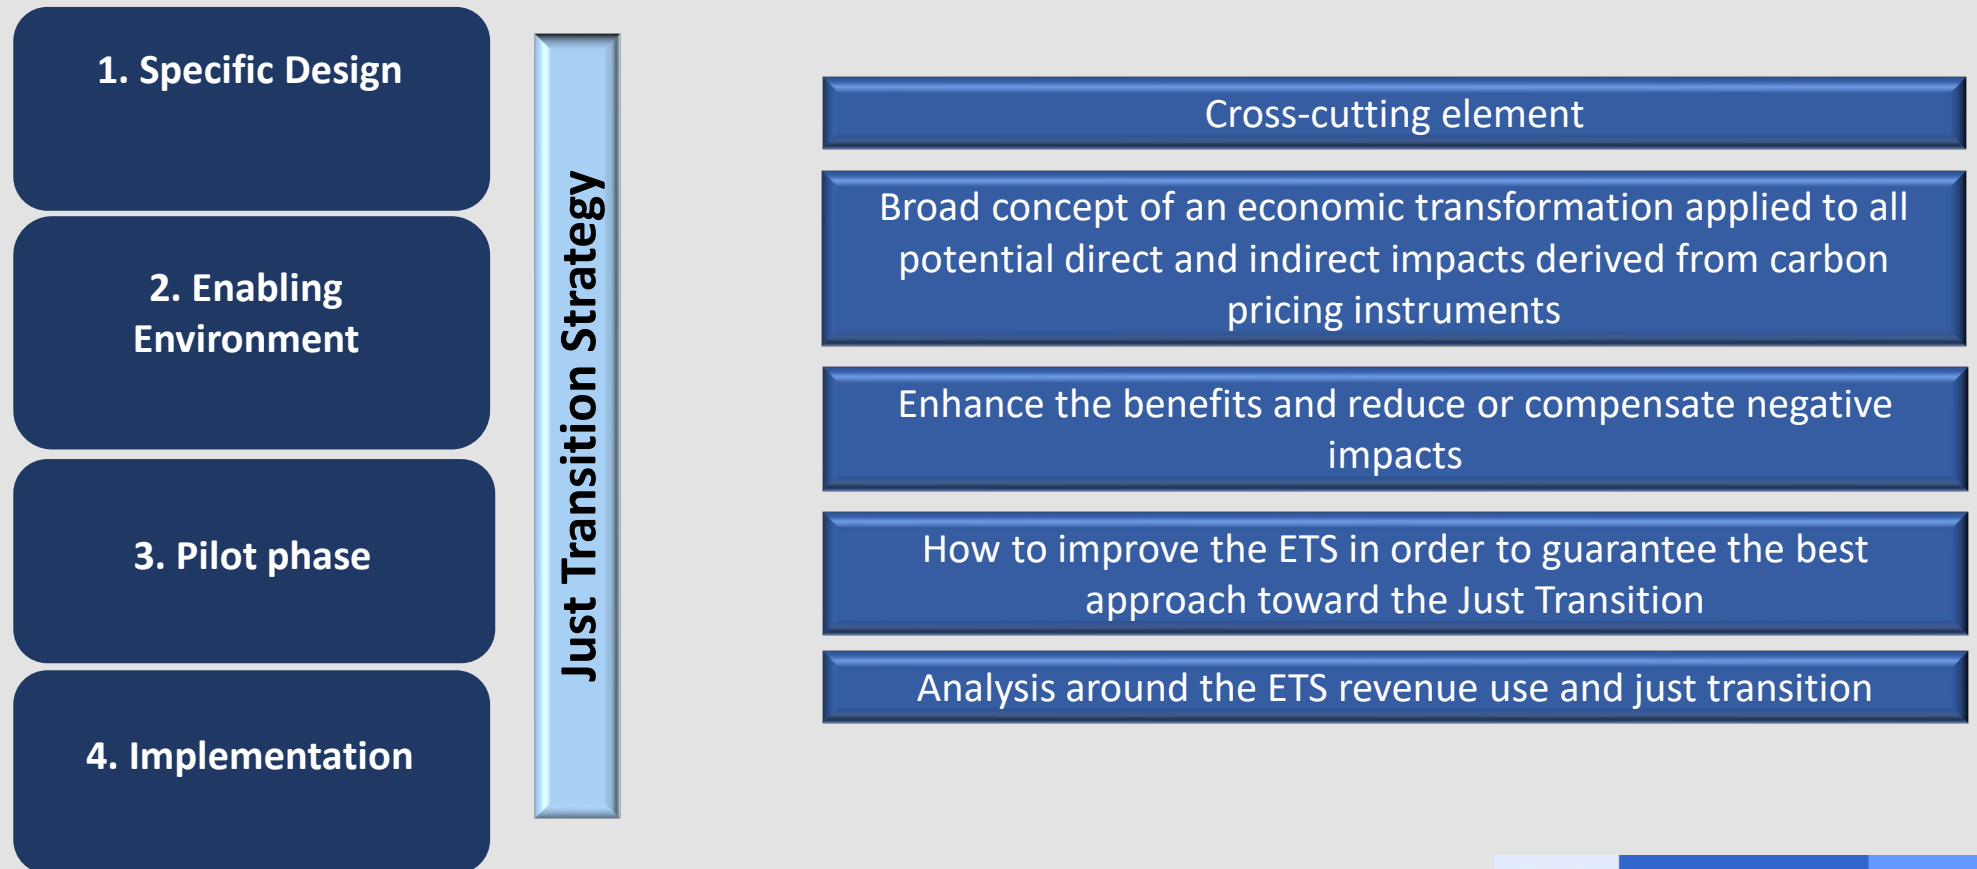

- Enhance the promotion of green jobs
- Development of new labor capacities
- Adaptation of the productive sector to face the challenges of green growth
- Enhance business formalization
- Increase in labor productivity

Training: "Towards a greener and fairer employment recovery strategy in Colombia"

Just Transition in the PMI planned work

Challenges and opportunities for measures related to Just Transition in the context of the country

Broad concept and approach of Just Transition (gender impacts, territorial impacts, impacts on minorities, indigenous people and vulnerable population, intergenerational considerations, natural capital preservation)

Alignment with scope and coverage of the carbon pricing instrument(s)

Continuous improvement of the Just Transition Strategy

Dialogue around Just Transition

Identification of primary or secondary stakeholders as applicable

Enhance and take advantage of the positive impacts

Redistribution of public funds and revenues
